### CAREER OBJECTIVE

Motivated fresher passionate about software development, skilled in Python, HTML, CSS, JavaScript, and React. Focused on building responsive applications and expanding technical expertise. Eager to contribute, innovate, and grow as a Full Stack Developer.

### EDUCATION

St. Ann's College of Engineering and Technology Aug 2021 - Apr 2025  
Bachelor of Technology in Computer Science and Engineering CGPA: 7.4 / 10

### SKILLS SUMMARY

- **Frontend:** HTML, CSS, JS, React
- **Backend:** Python, Django
- **AI Agents:** N8n, Ollama
- **Frameworks:** Vite, Vue, Tailwind
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Word, Excel, PowerPoint, Postman
- **Platforms:** Jupiter Notebook, Visual Studio Code, Google Colab
- **Soft Skills:** Teamwork, Adaptability, Problem Solving, Leadership

### PROJECTS

#### AI Agent for Automated IT Jobs Delivery | [LINK](#) March - April 2025

- Built an AI-driven automation agent using n8n to fetch and deliver the Top 5 Freshers IT Jobs daily at 5 AM via RSS feeds.
- Streamlined job discovery workflow by reducing manual effort and latency in job delivery by 90%.

#### Online Auction System (Academic Project) | [LINK](#) January - May 2025

- Designed and developed a full-featured web-based auction platform as part of final-year academic.
- Enabled real-time bidding, user authentication, product listings, bid history with a focus on security.
- Implemented countdown timers, bid validation, and session handling using HTML, CSS, and JavaScript for a seamless experience.

#### Personal AI Model Web App using Local LLM ( LLaMA 3.2 + Ollama ) | [LINK](#) July - August 2024

- Built a fully local AI-powered web app using JavaScript and the LLaMA 3.2 model via Ollama.
- Developed a lightweight UI for user interactions, with real-time AI responses rendered directly in the browser and no cloud required.

### INTERSHIPS

#### Python Full Stack Developer Intern – Data Valley | [LINK](#) Jan - Mar 2025

- Developed and deployed a user-friendly web application using React and Python.
- Improved performance by 30% and created responsive designs with clean code.

#### Python Developer Internship – AICTE | [LINK](#) May - July 2023

- Gained hands-on experience in Python programming, working on backend development and scripting.
- Collaborated on database integration using MySQL and performed API development.

#### Salesforce Developer Virtual Intern – Smart InternZ | [LINK](#) Aug - Oct 2023

- Completed an 8-week internship covering Salesforce fundamentals, Apex, Flows, and LWC.
- Developed components using VS Code & Salesforce CLI with hands-on project experience.

### CERTIFICATES

Microsoft Azure Fundamentals (Microsoft) | [CERTIFICATE](#) Mar 31, 2023

Google IT Support (Coursera) | [CERTIFICATE](#) July 17, 2024

AI / ML Workshop at IIT Hyderabad (Remarkskill) | [CERTIFICATE](#) Apr 13,14, 2024

GitHub / Prompt Engineering Workshop (Microsoft) | [CERTIFICATE](#) July 12, 2025

Python, Java, IOT, Software Testing (NPTEL) | [CERTIFICATE](#) July - oct 2023

Python, Java, CSS (Hacker Rank) | [CERTIFICATE](#) Apr - Nov 2023
