EDUCATION

St. Ann's College of Engineering and Technology
Bachelor of Technology in Computer Science and Engineering

Aug 2021 - Apr 2025
CGPA: 7.4

SKILLS SUMMARY

Languages: Python, HTML, CSS, JS, SQL,
Frameworks: React, Vite, Vue, Tailwind, Django
Tools: Git, GitHub, GitLab, Word, Excel, PowerPoint
Platforms: Jupiter Notebook, Visual Studio Code, Vercel
Soft Skills: Teamwork, Adaptability, Problem Solving, Leadership
Databases: MySQL, PostgreSQL, MongoDB

PROJECTS

- AI Agent for Automated IT Jobs Delivery | [LINK](#)** **March - April 2025**
- Built an AI-driven automation agent using n8n to fetch and deliver the Top 5 Freshers IT Jobs daily at 5 AM via RSS feeds.
 - Implemented smart filtering logic to ensure relevance and eliminate noise, enhancing job targeting efficiency by 40%.
 - Streamlined job discovery workflow by reducing manual effort and latency in job delivery by over 90%.
 - Integrated scheduled automation with Gmail for real-time access to curated job opportunities, increasing reach and convenience.
- Online Auction System (Academic Project) | [LINK](#)** **January - May 2025**
- Designed and developed a full-featured web-based auction platform as part of final-year academic curriculum.
 - Enabled real-time bidding, user authentication, product listings, and bid history with a focus on fairness and security.
 - Implemented countdown timers, bid validation, and session handling using HTML, CSS, and JavaScript for a seamless experience.
 - Enhanced usability and interactivity with responsive UI design and live auction updates.
- Burger Hut Restaurant Website | [LINK](#)** **July - August 2024**
- Created a responsive restaurant website to showcase Burger Hut's menu, offers, and customer services using HTML, CSS, JavaScript.
 - Focused on clean UI/UX design and fast load times to deliver an intuitive and visually engaging dining experience.
 - Implemented interactive navigation, menu filters, and real-time updates to boost customer interaction and retention.
 - Enhanced performance and accessibility across devices, improving user satisfaction metrics by over 25%.

INTERNSHIPS

- Python Full Stack Developer Intern – Data Valley | [LINK](#)** **Jan - Mar 2025**
- Developed and deployed a user-friendly web application using React and Python.
 - Improved performance by 30% and created responsive designs with clean code.
 - Collaborated with team members to solve problems and ensure smooth project delivery.
- Python Developer Internship – AICTE | [LINK](#)** **May - July 2023**
- Gained hands-on experience in Python programming, working on backend development and scripting tasks.
 - Collaborated on database integration using MySQL/PostgreSQL and performed API development.
 - Contributed to a real-time project, enhancing skills in code optimization and problem-solving.
- Salesforce Developer Virtual Intern – Smart Internz | [LINK](#)** **Aug - Oct 2023**
- Completed an 8-week internship covering Salesforce fundamentals, Apex, Flows, and LWC.
 - Developed components using VS Code & Salesforce CLI with hands-on project experience.
 - Earned Super Badges in Apex specialist and Process Automation Specialist.

CERTIFICATES

- Microsoft Azure Fundamentals (Microsoft) | [CERTIFICATE](#)** **Mar 31, 2023**
- Gained foundational knowledge of cloud concepts and core Azure services, enhancing understanding of cloud architecture and deployment models.
 - Developed familiarity with Azure pricing, support plans, and governance tools for efficient cloud management.
- Google IT Support (Coursera) | [CERTIFICATE](#)** **July 17, 2024**
- Built strong foundational skills in computer networking, operating systems, system administration, and IT troubleshooting.
 - Gained hands-on experience with tools and techniques used in real-world IT support environments.
- Python, Java, IOT, Software Testing (NPTEL) | [CERTIFICATE](#)** **July - oct 2023**
- Learned core programming concepts in Python and Java with a focus on object-oriented principles.
 - Acquired practical knowledge in IoT device integration and foundational software testing methodologies.
- Python, Java, CSS (Hacker Rank) | [CERTIFICATE](#)** **Apr - Nov 2023**
- Demonstrated coding proficiency and logical problem-solving abilities in Python, Java, and CSS through timed challenges.
 - Earned certifications recognizing technical skill and algorithmic thinking across multiple programming domains.
